

EDIUS 11

Software Version 11.00.13147 – Release Notes – November 2023

New Features

EDIUS

- Added "Add Title..." to the context menu of the Bin window
- Added "Edit..." to the context menu of the Bin window to edit color bar clips, color matte clips and title clips
- Added a feature to register a folder containing supported source formats with the folder structure held intact
- Added new Upgrade / Jump upgrade license types to EDIUS 11 Pro
- Added support for importing XAVC H clips

Mync

- Added support for importing XAVC H clips

Fixed Issues

EDIUS

- Almost all shortcut keys do not work if an item in the Mync window or Job window is focused
- Timeline sequences rendered with older generation EDIUS are loaded as unrendered
- Export with the "Show separate render progress dialog" option does not start if EDIUS is playing the timeline (SFDC00860036)
- In MXF exporter, selection of destination is always reset from FTP to Folder (SFDC00860471)
- View mode of Source Browser is changed from "Clip" to "Thumbnail" when a project is opened (SFDC00860471)
- EDIUS crashes when opening some projects
- Initialization of Mync window and/or Job monitor window fails
- A debug window named "Legacy Bin" appears incorrectly
- Bin file conversion gives incorrect results if the target clip is imported by one of certain types of third-party importers
- K2 FTP source browser sends '\\' (backslash) instead of '/' (slash) to the FTP servers (SFDC00867493)

Mync

** No fix provided*
